## EXPERIENCE

---

**Frontend Developer**

Jan 2025 - Present

Leaf AI

*Dubai, 15.12.20*

- Built an IoT platform for real-time environmental sensor data, AI insights, and device integration.
- Created an invoice system with payment tracking, discounts, and real-time reporting.
- Developed business management app with sales, inventory, and customer management modules.

**Frontend Developer**

Jan 2023 - Dec 2024

Infomover

*Vodara, Gujarat*

- Built a time tracking app using Next.js and UI libraries with a Java backend.
- Developed a React Native mobile app for on-the-go time monitoring.
- Developed a multi-homepage job posting platform using Bootstrap and Redux.
- Designed a marketing site in Next.js to showcase product features and benefits.
- Built a React Native mobile app for discovering and booking nearby events and shows.

## PROJECTS

---

**Career Bridge – Job Posting Platform.** Developed a job posting platform with multiple homepages and advanced features using Bootstrap and Redux. ([Live Demo](#))

**Time Monitoring Application.** Built a web app using Next.js and UI libraries with a Java backend to track and manage time. Also developed a mobile version using React Native for on-the-go access. ([Live Demo](#))

**Happening App – Event Booking Platform.** Created a React Native mobile app to discover and book nearby events and live shows seamlessly. ([Live Demo](#))
